

JET-SET® Pedestal Mount Pumping System

MOBILE AIR DRIVEN PUMPING STATION

We designed this turnkey lubrication system to supply both, JET-SET® spray nozzles and a JET-SET® Roller Coater at the same time. Utilizing our signature JET-SET® 9100 piston pump, this system is capable of supplying lube to 4 spray nozzles and a rolling stock lubricator. Pump timing is easily controlled through the use of an on-board analog timer. It can work as a stand alone unit that is plugged into a standard 110v outlet or it can be wired into your press for system activation. Each system also contains a reservoir and an air regulator. ***Systems are available with options like 24v dc, 110v and 220v, and 7 or 20 gallon tanks. Contact us for pricing of customized applications.***

The JET-SET® Pedestal System can also come with multiple pumps, solenoid or counter.

PS-1E	1 Pump Electric Solenoid	\$2,350
PS-1E	1 Pump Electric with Counter	\$2,935

PS-1ET	1 Pump Electric with Timer	\$2,800
PS-2E	2 Pumps Electric Solenoid	\$2,895
PS-2EC	2 Pumps Electric with a Counter	\$3,480
PS-2ET	2 Pumps Electric with a Timer	\$3,350
