

# JET-SET® ROLLER COATER

THE MOST RUGGED COIL STOCK LUBRICATION SYSTEM IN THE INDUSTRY

*The leaders in Hydraulic Spray Technology since 1963.*

JET-SET® introduces the most rugged rolling stock lubricator on the market. Available in 12" & 30" models. Lube can feed externally through the drip tube located above the upper roll or, internally. Lube is fed through the inside of the 2" diameter aluminum rollers. It then saturates the 2-1/2" dia F7 felt rollers. Excess lube is caught in the drip trough and can be fed back into the reservoir.

The unit is available with compression springs or air cylinders. It is easily adjusted to integrate with other lubrication systems and pumps.

### NEW FEATURES:

- 3/16" Steel Leads
- New Larger 2 1/2" Felt Rolls
- 1"Ø Hardened Steel Shafts
- Compression Springs or Air Cylinders
- Configurable in 8 different models
- Rugged aluminum and steel construction
- Easily integrates with other JET-SET® pumps and systems

**When ordering please specify JS-RC-12 for 12" model or JS-RC-30 for 30" model**

<b>SPECIFICATIONS:</b>	
MODEL NAME:	JET-SET® Roller Coater
MATERIAL WIDTH:	1" up to 30"
MATERIAL THICKNESS:	.004" - .250"
PRICING:	<i>(Call for a customized quote.)</i>

In business since 1963, for over 5 decades JET-SET® has supplied the metal forming industry with superior service and spray lubrication systems. JET-SET® has the capability of designing and manufacturing turn key lubrication systems for any application.
